Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al. [5,415,573].

Chen et al. disclose a printed circuit board holding structure [figures 1 and 2] for attaching a printed circuit board [16] on an attachment object member, the printed circuit board defining a longitudinal direction, the holding structure comprising:

a chassis/housing [abstract, line 6]; a first guide member connected to the chassis and having a taper face [26b] for guiding the printed circuit board in the traverse direction traverse to the longitudinal direction in response to fixedly putting the printed circuit toward the chassis on the attachment object member; and a second guide member having a taper face [40] for guiding the printed circuit board toward the chassis in response to sliding the printed circuit board in the longitudinal direction.

Regarding claims 2 and 3, Chen et al. disclose the second side guide member including a stop means and side end face for the circuit board [figure 3c].

Regarding claim 4, Chen et al. disclose an elastic stop member in the attachment member [26].

Response to Arguments

Applicant's arguments filed 08/07/03 have been fully considered but they are not persuasive.

Applicant argues that, Chen et al. does not teach sliding a circuit board in each longitudinal direction, which is parallel to a side edge of the chassis.

Examiner disagrees: Chen et al. teaches the board being slid into the receptacle in a direction parallel to the chassis, see figure 1. Applicant does not preclude deformation of the side walls.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
